THE COMMUNITY COLLEGE GRADUATE FOLLOW-UP SURVEY REPORT

1999

NOVA SCOTIA DEPARTMENT OF EDUCATION
PLANNING AND RESEARCH DIVISION

HONOURABLE JANE PURVES
MINISTER

January 2000

To the best of the author's knowledge, the information in the *Community College Graduate Follow-up Survey 1999* is accurate for the 1997-98 Community College academic year. However, information found in this survey may not reflect recent program and policy changes. It is recommended that the reader verify information provided here with the appropriate campus (see Section II of this Report) when making choices about training options.

Dear Reader:

As Minister of the Department of Education, I am pleased to release the results of the *1999 Nova Scotia Community College Graduate Follow-Up Survey* administered by our Planning and Research Division.

The results of the 1999 survey, summarized in this report, highlight the employment experiences of 1998 Nova Scotia Community College graduates one year after graduation, providing our education partners with a better understanding of the labour market demand for Community College graduates. Additionally, students, counsellors and educators may find this an informative resource, assisting them in the challenging and exciting process of career decision-making.

I wish to extend my sincere thanks to each of the Nova Scotia Community College graduates who participated in this survey. Their participation in this survey is instrumental in ensuring that the Nova Scotia Community College system continues to be responsive to the training needs of students and employers across Nova Scotia and around the world.

Yours truly,

Jane Purves

1999 COMMUNITY COLLEGE GRADUATE
FOLLOW-UP SURVEY REPORT

USER'S QUESTIONNAIRE/ORDER FORM

As a user of the **1999 Community College Graduate Follow-up Survey Report**, your opinion about the graduate employment outcome information presented is valuable for making changes and improvements in future documents. Please help us plan for future editions of the Community College Graduate Follow-up Survey Report by completing the following questionnaire.

1. Was the report useful and easy to understand? ❑ yes ❑ no

2. Were the one page program profiles easy to understand? ❑ yes ❑ no

3. Is there any additional information which would have been useful in the written description of the occupational profiles? If yes, please elaborate.

INTRODUCTION

INTRODUCTION

BACKGROUND

The Community College Graduate Follow-up Survey Report, 1999 was compiled by the Nova Scotia Department of Education, Planning and Research Division. It presents findings from the 1999 Graduate Follow-up Survey. All students who graduated in 1998 from the Nova Scotia Community College and the Trades and Technical Faculty of the University College of Cape Breton were surveyed approximately one year after completing training to determine their employment status.

SCOPE

The 1999 survey covered the population of 1998 graduates from 14 of Nova Scotia's training institutions, consisting of 13 Campuses of the Nova Scotia Community College and the University College of Cape Breton (trades and technical programs). A complete list of these institutions is found in Section II of this report. Those excluded from the Graduate Follow-up Survey included students who dropped out or failed to complete a program and graduates who were unable to be located.

Information about the employment status of graduates was gathered for the reference week of June 20 - June 26, 1999, which is approximately one year after graduation. Employment levels change over time, therefore, it is important to keep in mind that **the survey findings show the outcomes of graduates for one point in time; during the week of June 20 - June 26, 1999.**

METHODOLOGY

The survey methodology involved a telephone questionnaire (see Appendix C), which was administered between June 23, 1999 and August 23, 1999. The participating institutions were instrumental in the successful completion of the survey by providing their lists of graduates. Their assistance is gratefully acknowledged by the Planning and Research Division. With their assistance a response rate of 86.4% was attained, when adjusted for ineligible telephone numbers. Of the 4,039 community college graduates of 1998, 2,476 responded to the survey.

The high overall response rate and consistent survey methodology resulted in accurate and reliable data. However, in order to interpret and understand the individual program statistics, **readers are advised to carefully review the User's Guide in the PROGRAM STATISTICS section of this report.**

REPORT ORGANIZATION

The report is comprised of six sections. The Introduction is followed by Section II which lists the institutions whose graduates were surveyed. Readers are advised to contact individual institutions if they are interested in obtaining information on programs which are not included in this report.

In Section III, a list of other sources of information on post-secondary programming is provided for reference.

In Section IV, the general findings of the Graduate Follow-up Survey are summarized.

Section V of the report provides employment and unemployment rates for each program in order to facilitate comparison with employment and unemployment rates which are reported monthly by Statistics Canada. The first table lists employment and unemployment rates by program (ordered alphabetically) based on responses of 1998 community college graduates to the 1999 Graduate Follow-up Survey. The results of programs that had very small populations (ten or less) or small numbers of respondents (five or less) were omitted from this report for both statistical reliability and confidentiality purposes. The second table provides rates based on the responses of 1997 community college graduates to the 1998 Graduate Follow-up Survey. This table includes only those programs which met the 'ten or more' population or 'five or more' respondents confidence level as analysed in the 1998 study. Both tables have been included to allow for a year-to-year comparison regarding employment and unemployment rates by program.

Section VI provides a User's Guide, followed by information on the outcomes of respondents for each program using a standard one-page table format. It is important to carefully review the User's Guide to gain a clear understanding of the program statistics presented in this report. The guide includes an overview of definitions, survey terminology, methodology used to compile results, and the presentation format as well as general guidelines regarding the interpretation of survey results. The one-page profiles of program statistics which follow the User's Guide contain the following survey results by program: labour market outcomes of all respondents; distribution of employment by type of employment (full time/part time, permanent/temporary); total employed, unemployed and not in the labour force; distribution of employment by location; most frequent wage levels and occupations and industries of employment.

Three appendices are attached to this report. Appendix A outlines the major occupational groups of the National Occupational Classification, 1993 used for coding purposes in the survey. These groups are used to indicate most frequent occupational categories in the Program Statistics section. Appendix B outlines the industry divisions of the Standard Industrial Classification also used for coding purposes in the survey. Again, these divisions are used to indicate most frequent industries of employment in the Program Statistics section. Finally, Appendix C is a copy of the questionnaire used to survey 1998 graduates.

II

LIST OF INSTITUTIONS

LIST OF INSTITUTIONS

The statistics contained in this report are categorized by program, as detailed in the program profiles in Section VI. In many cases programs were offered at more than one institution. Readers who are interested in obtaining information about individual programs and specific institutions are advised to contact the institution. **The institutions listed below reflect the recent restructuring of the Nova Scotia Community College (NSCC) system. Therefore, there may be differences between those campuses found here and those from which graduates completed studies in 1998.**

Institution and Address	Phone	Principal	Counsellor
NSCC - Annapolis Valley Campus 50 Elliot Road Lawrencetown, N.S. B0S 1M0	(902) 825-2930	Mr. David Woolnough	Ms. Daisy Dwyer, Registrar/Student Services Officer

OTHER SOURCES OF INFORMATION

OTHER SOURCES OF INFORMATION

Further information on post-secondary education programs can be found through a number of other sources including the following:

Calendars may be obtained from post-secondary institutions, local Human Resources Development Canada Centres and guidance counsellors. These calendars should be referenced for specific information on programs, including prerequisites required for entry.

Apprenticeship Training program information may be obtained from the Apprenticeship Division, Department of Education. Telephone (902) 424-8903.

Career Options: An Occupational Handbook for Nova Scotians. A publication of the Planning and Research Division, Department of Education. Telephone (902) 424-4740.

Careers Ahead. A publication of Student Services, Department of Education. Telephone (902) 424-4576.

General Admission Requirements for Universities, Colleges and Institutes. A publication of Student Services, Department of Education. Telephone (902) 424-4576.

Directions: An Inventory of Education and Training Offered in Nova Scotia. A publication of Career and Transition Services, Department of Education. Telephone (902) 424-5163.

Choices. An interactive computer program available at all junior high and high schools in the province.

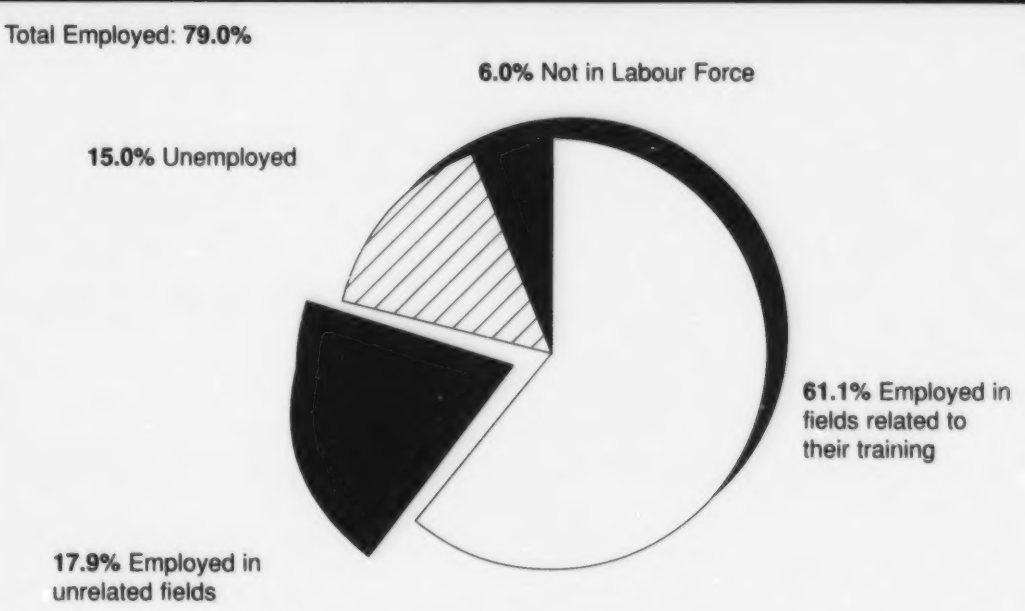
IV

OVERVIEW OF SURVEY RESULTS

OVERVIEW OF SURVEY RESULTS

FIGURE 4.0

SUMMARY OF OUTCOMES
1999 GRADUATE FOLLOW-UP SURVEY



Total Employed: 79.0%
6.0% Not in Labour Force
15.0% Unemployed
61.1% Employed in fields related to their training
17.9% Employed in unrelated fields

EMPLOYMENT RESULTS

Analysis of data collected from the 1999 Graduate Follow-up Survey indicates that 79.0% of 1998 graduates surveyed were employed during the week of June 20 - June 26, 1999. Survey results also showed the type of employment graduates obtained. Among all the respondents 61.1% had jobs related to their training and 17.9% were employed in jobs which they considered to be unrelated to their training.

UNEMPLOYED OR NOT IN THE LABOUR FORCE

The survey results indicate that 15.0% of the respondents were unemployed during the week of June 20 - June 26, 1999, and the remaining 6.0% were not in the labour force at that time. The reasons for respondents not being in the labour force are summarized in Table 4.1.

TABLE 4.1

REASONS WHY RESPONDENTS WERE NOT IN THE LABOUR FORCE

	Number #	Percentage %
Attending school/work term	57	39.58
!llness or disability	29	20.14
Discouraged worker	11	7.64
Personal or family responsibility	47	32.64
Total	**144**	**100.00**

EMPLOYMENT AND UNEMPLOYMENT RATES

EMPLOYMENT AND UNEMPLOYMENT RATES

Tables 5.0 and 5.1 list employment and unemployment rates which have been calculated from the survey results with the calculation method used by Statistics Canada to report the official unemployment rate. Through the Labour Force Survey, Statistics Canada determines unemployment rates for Canada and for the regions, as well as various age groups on a monthly basis. For example, the youth (15-24 years) unemployment rate for Nova Scotia was reported as 19.7% in June 1999 and 14.6% in July 1999 by Statistics Canada. This method of calculation includes only those individuals in the labour force and it is outlined below with reference to the Accounting program statistics from the 1999 Graduate Follow-up Survey. This calculation is different from percentages employed and unemployed given in the Program Statistics (Section VI) of the report where the proportions are ratios calculated on the basis of all respondents including those who were not in the labour force. The ratio method of calculation is useful from a program perspective in showing outcomes of all survey respondents.

Employment and unemployment rates in Tables 5.0 and 5.1 are calculated on the basis of the number of people in the labour force. Those in the labour force are defined as people who are employed or not working but seeking employment. For example, in Accounting, 22 were employed and 4 were unemployed, giving a total of 26 (22+4) who were in the labour force. Therefore, the employment and unemployment rates for Accounting were 84.6% and 15.4% respectively.

These employment and unemployment rates have been provided for each program to facilitate comparison of labour force statistics reported by Statistics Canada. Table 5.0 lists employment and unemployment rates based on the responses of 1998 community college graduates to the 1999 Graduate Follow-up Survey. Additionally, Table 5.1 provides employment and unemployment rates based on responses of 1997 community college graduates to the 1998 Follow-up Survey.

Employment rate = $\frac{\text{\# Employed}}{\text{\# In Labour Force}}$ X 100 = $\frac{22}{22+4}$ x 100 = 84.6%

Unemployment rate = $\frac{\text{\# Unemployed}}{\text{\# In Labour Force}}$ X 100 = $\frac{4}{22+4}$ x 100 = 15.4%

Note: Employment and unemployment rates shown in the above table have only been provided for programs which have a population greater than ten and a number of respondents greater than five.

VI

PROGRAM STATISTICS

PROGRAM STATISTICS

USER'S GUIDE

The User's Guide explains the terms and statistics presented in this report. Each page of the Program Statistics Section contains a statistical summary for a program. All pages follow the same format. For example, the Accounting program (presented on the next page) is used in the explanation which follows.

Before beginning detailed explanations, several general observations should be noted regarding the use of survey statistics. First, employment levels change over time; the information contained in this report describes the status of graduates during the week of June 20 - June 26, 1999. Second, while the overall survey response rate of 86.4%, and the overall number of responses, 2,476, are excellent for a telephone survey, the data for some individual programs may be based on a lower response rate, or a small population. The methodology of the survey allows for high statistical accuracy in most cases despite the occurrence of small sample sizes for some programs. This is because the sample (number of respondents) comprises a high proportion of the program population. However, when using survey data which has been aggregated at the program level, it is important to exercise caution in interpreting the results. Programs with small populations or with response rates of less than 50%, may be less accurate due to the small number of respondents. In such instances, the reader should consider the individual program results cautiously and recognize that results apply only to those responding to the survey; broad generalizations cannot be supported.

Furthermore, for programs with small populations and few respondents there is the potential of compromising the confidentiality of individual graduates. For this reason, programs with populations of ten or less or respondents of five or less have been omitted from the report. Of the 139 programs surveyed, 48 programs were omitted for this reason. These programs, together with their locations are provided in Table 6.0.

Finally, it is important that persons using the information in the Program Statistics Section understand the tables which follow are but one of several instruments which readers may utilize to obtain information about community college programs and employment.

ACCOUNTING

Program Location: Burridge, I.W. Akerley, Kingstec, Truro

Survey Population: 44 **Respondents:** 28 **Response Rate:** 63.6%

Business Service	3	(13.6)

Definitions

Program Location lists the institution or institutions which had graduates from the program (named at the top of the page) in the 1997-1998 academic year. The Accounting program for example, had graduates from Burridge, I.W. Akerley, Kingstec and Truro.

Survey Population is the number of people who graduated from the program in 1998. For Accounting, the survey population was 44.

Respondents are the number of graduates of the program who responded to the questionnaire. Accounting had 28 respondents.

Response Rate is the percentage of the survey population responding to the questionnaire. The response rate for Accounting was 63.6%. It can be expressed as:

$$\frac{\text{Number of Respondents}}{\text{Survey Population}} \times 100 = \frac{28}{44} \times 100 = 63.6\%$$

Labour Market Outcomes shows the status of all program respondents during the week of June 20 - June 26, 1999. The numbers are reported in both percentages (in parentheses) and actual figures. **The percentages are expressed in terms of the total respondents.** For example, in Accounting the 78.6% of employed respondents represents 22 out of the total respondents (28). **Employed** respondents are defined as those who are working, or holding a job from which they are temporarily absent due to illness, vacation, labour dispute etc. The **unemployed** are those who are not working, but seeking work. Persons **not in the labour force** are those neither working nor seeking employment. They may be out of the labour force for a variety of reasons including attending school, personal or family responsibility or due to illness or disability.

Summary of Respondents' Outcomes outlines the type of employment graduates obtained approximately one year after graduation, as well as the proportions unemployed and not in the labour force. Numbers are reported in both percentages (in parentheses) and actual figures. All percentages in this section are expressed in terms of the number of respondents. For example, 14.3% of respondents were unemployed in the Accounting program, that is 4 out of 28. Type of employment is indicated in a matrix with reference to (1) **employment category** and (2) **relation of employment to training.** This allows the user to determine specifically what type of employment graduates obtained. For example, it is seen that in Accounting 50.0% or 14 graduates were working in full time - permanent employment which is related to training. The categories which are used in the matrix are defined below.

(1) Employment Category

Employment is specified in terms of permanent/temporary and part time/full time. There are four types of employment categories outlined in the **Summary of Respondents' Outcomes.**

Full Time employment is defined as 30 hours per week or more.

Part Time employment is defined as less than 30 hours per week.

Permanent employment has no pre-arranged termination date.

Temporary employment ends at a pre-arranged date (e.g. summer job).

Totals for type of employment are indicated under the third column heading labelled **"TOTALS".** In Accounting for example, the total employed in full time - permanent employment is 16 or 57.1%.

(2) Relation of Employment to Training

Relation of employment to training is determined from responses to the survey question: "In your opinion, would you say your job was directly related, indirectly related, or not related at all to your Community College training in (NAME OF PROGRAM)?" Two categories are identified in the Program Statistics:

Related employment is work which is directly or indirectly related to training. The number of people who responded that their job was "directly related" or "indirectly related" to their training is reported under this category.

Employment not related to training is work which has very little or no relationship to the training received. The number of people who responded that their job was "not related" to training is reported under this category.

Totals for "relation of employment to training" are indicated below each category in the fifth row of numbers which is labelled **"TOTAL EMPLOYED".** In Accounting for example, 20 or 71.4% were employed in jobs related to training. The last set of figures in this row gives the **TOTAL EMPLOYED** at any type of job. For Accounting, 78.6% or 22 persons were employed at any type of job. As previously stated, the employed are defined as those who are working or holding a job from which they are temporarily absent due to illness, vacation, labour dispute, etc.

The last two lines of this section give the numbers **UNEMPLOYED** and **NOT IN THE LABOUR FORCE.** The unemployed are those who are not working but are seeking employment. Persons not in the labour force are neither working nor seeking employment. In Accounting, 14.3% or 4 are unemployed, and 7.1% or 2 are not in the labour force.

ROUNDING NOTE

In some cases percentages in the **"SUMMARY OF RESPONDENTS' OUTCOMES"** may not add up to the totals indicated, due to rounding. All percentages have been rounded to one decimal point. For accuracy, the percentages for totals are calculated from actual number totals rather than adding the rounded percentages.

EMPLOYED RESPONDENTS

In **CHARACTERISTICS OF EMPLOYED RESPONDENTS** locations, wage levels, occupational categories and industries of employment are outlined. Again, numbers are reported in percentages (in parentheses) and actual figures. (In some cases numbers may not add up to the total number employed due to missing data.) **All percentages in this section are expressed in terms of the number of employed respondents.** In Accounting for example, 27.3%, or 6 out of 22 of the employed graduates are working in the Halifax region of Nova Scotia.

Location of employment by region is provided by regions of Nova Scotia and elsewhere where applicable. The definition of the regions are summarized below.

Halifax County
All of the Halifax Metro region and surrounding county

South West Nova Scotia
Digby, Lunenburg, Queen, Shelburne and Yarmouth Counties

Annapolis Valley
Annapolis, Hants and Kings Counties

North East Nova Scotia
Antigonish, Colchester, Cumberland, Guysborough and Pictou Counties

Cape Breton
Cape Breton, Inverness, Richmond and Victoria Counties

Other
Other provinces of Canada (excluding Nova Scotia), USA and other

Most frequent starting wage levels (per hour) are reported. The survey questionnaire presents a scale of four hourly wage levels: $5.50 to $8.50, $8.51 to $11.50, $11.51 to $14.50, and over $14.50 per hour.

Most frequent occupational categories are provided next. The occupational categories are the ten major occupational groups defined in the *National Occupational Classification, 1993.* The occupational groups which are referred to in this document are defined in Appendix A. Where applicable, figures for the four most frequent occupational categories of employed graduates are indicated.

Most frequent industries of employment are also provided for each program. Industries referred to are the industry divisions of the *Standard Industrial Classification (SIC).* The SIC is a guide which defines economic production by groups of firms or industries engaged in similar types of activity with respect to goods and services production. The major industry divisions of the SIC which are referred to in this document are defined in Appendix B. Where applicable, figures for the four most frequent industries of employment for graduates are indicated.

APPENDIX A

MAJOR OCCUPATIONAL CATEGORIES OF *THE NATIONAL OCCUPATIONAL CLASSIFICATION*, 1993

MAJOR OCCUPATIONAL CATEGORIES OF *THE NATIONAL OCCUPATIONAL CLASSIFICATION*, 1993

Management Occupations

This skill type category includes legislators, senior management occupations and middle and other management occupations.

Business, Finance and Administration

This category contains occupations that are concerned with supervising and providing financial and business services, administrative and regulatory services and clerical support services. Some occupations in this category are unique to financial and business service industries; most are found in all industries.

Natural and Applied Sciences and Related Occupations

This category contains professional and technical occupations in the sciences, including physical and life sciences, engineering and architecture.

Health Occupations

This category includes occupations concerned with providing health care services directly to patients and occupations that provide support to professional and technical staff.

Occupations in Social Science, Education, Government Service and Religion

This skill type category includes a range of occupations that are concerned with law, teaching, counselling, conducting social science research, developing government policy and administering government and other programs.

Occupations in Art, Culture, Recreation and Sport

This skill type category includes professional and technical occupations related to art and culture, including the performing arts, film and video, broadcasting, journalism, writing, creative design, libraries and museums. It also includes occupations in recreation and sport.

Sales and Service

This skill type category contains sales occupations, personal and protective service occupations and occupations related to the hospitality and tourism industries.

Trades, Transport and Equipment Operators and Related Occupations

This skill type category includes construction and mechanical trades, trades supervisors and contractors and operators of transportation and heavy equipment. These occupations are found in a wide range of industrial sectors, with many occurring in the construction and transportation industries.

Occupations Unique to Primary Industry

This category contains non-technical occupations in mining, oil and gas production, forestry and logging, agriculture, horticulture and fishing.

Occupations Unique to Processing, Manufacturing and Utilities

This category contains supervisory and production occupations in manufacturing, processing and utilities.

APPENDIX B

STANDARD INDUSTRIAL CLASSIFICATION INDUSTRY DIVISIONS, 1981

STANDARD INDUSTRIAL CLASSIFICATION INDUSTRY DIVISIONS, 1981

Agriculture and Related Industries

This division includes: livestock and animal specialty farms, field crop farms, field crop combination farms, fruit and other vegetable farms, horticultural specialties, livestock, field crop and horticultural combination farms, and service industries incidental to agriculture.

Fishing and Trapping Industries

This division includes: salt water and inland fishing, fish farms, services incidental to fishing, wild fur and skin trapping, and other trapping.

Logging and Forestry Industries

The logging industry includes establishments primarily engaged in producing round wood. Activities of such establishments involve driving, booming, sorting and rafting, and towing wood. Barking mills are also included. The forestry industry includes establishments primarily engaged in gathering forest products; in forestry patrol, fire protection and fire fighting; and in forest nurseries, reforestation and other forestry services. Forestry farms and timber crop operations are also in the forestry industry.

Mining Industries (Includes Milling, Quarrying and Oil Well)

This division includes: metal mines, non-metal mines such as asbestos, salt or gypsum, coal mines, establishments primarily engaged in the exploration for and/or production of crude oil and natural gas, and establishments primarily engaged in extracting, crushing and screening igneous and sedimentary rocks from quarries.

Manufacturing

This division includes establishments primarily engaged in producing or manufacturing: food products, beverages, tobacco products, rubber products, leather and allied products, primary textiles, textile products, clothing, wood products, furniture and fixtures, paper and allied products, print, primary metal products, fabricated metal products, machinery, transportation equipment, electrical and electronic products, non-metallic mineral products, refined petroleum and coal products, chemicals and chemical products, and other goods such as scientific equipment, toys, jewellery, signs and musical instruments.

Construction Industries

Construction industries are composed of three major groups:

i) **Building, Developing and General Contracting Industries**, which includes both residential and non-residential building and development;

ii) **Industrial and Heavy (Engineering) Construction Industries**, which includes industrial construction other than buildings, highway and heavy construction; and

iii) **Trade Contracting Industries**, which includes site work, structural work, plumbing, heating, air conditioning and mechanical work, mechanical specialty work, electrical work, exterior close-in work, interior finishing work, and other trade work.

Service industries incidental to construction such as project management and land development are also under the Construction Industries division.

Transportation and Storage Industries

Transportation industries are primarily engaged in transportation of goods and passengers by air, railway, water and motor vehicles. Services incidental to such modes of transport are also included. Storage and warehousing industries are primarily engaged in operating grain elevators, general merchandise warehouses, cold storage and other storage facilities.

Communication and Other Utility Industries

Communication industries are those primarily engaged in providing telecommunications, broadcasting and transmission services and those operating postal and courier services. Other utility industries are primarily engaged in the generation, transmission and distribution of electricity; the distribution of natural gas through a system of mains; the treatment and distribution of water; and in operating other utilities.

Wholesale Trade Industries

Wholesale trade industries are primarily engaged in buying merchandise for resale to retailers; to industrial, commercial, institutional, farm or professional business users; to other wholesalers; or in acting as agents or brokers in buying merchandise for, or selling merchandise to such persons or companies on a commission basis. Establishments engaged in wholesale dealing in the following are included in this division: farm products, petroleum products, food, beverages, drugs, tobacco products, apparel and dry

goods, household goods, furniture, motor vehicle parts and accessories, metals, hardware, building materials, machinery, equipment, supplies, and other products such as used auto parts, seeds, toys, jewellery and books.

Retail Trade Industries

Retail trade industries are those primarily engaged in retail dealing, i.e. buying commodities for resale to the general public for personal or household consumption and in providing related services such as installation and repair. In general, retail establishments are classified by kind of business according to the principle lines of commodities sold and services provided. Establishments range from general merchandise stores and food stores to more specialized stores such as toy stores, jewellery stores and shoe stores.

Finance and Insurance Industries

This division consists of five major industry groups:

i) **Deposit Accepting Intermediary Industries**, including banks, trust companies and credit unions;

ii) **Consumer and Business Financing Intermediary Industries**, which are primarily engaged in extending loans to and/or financing equipment, facilities, inventory and sales for businesses and individuals. Consumer loan companies and business finance companies are included in this group;

iii) **Investment Intermediary Industries**, which are engaged in investing in portfolios of securities and other investments on behalf of their shareholders. Included in this group are establishments primarily engaged in financing mortgages, real estate and purchase leasebacks and holding of common and preferred stock for the purpose of exercising control;

iv) **Insurance Industries,** which are establishments primarily engaged in underwriting insurance such as life insurance, deposit insurance and property and casualty insurance; and

v) **Other Financial Intermediary Industries**, which are those primarily engaged in operating as security dealers and brokers, mortgage brokers, and security and commodity exchanges.

Real Estate Operator and Insurance Agent Industries

Real estate operator industries include real estate operators and owners, and lessors of real property. Also included in this division are establishments primarily engaged in the selling of insurance and pension products as independent agents or brokers. Independents dealing in real estate activities such as buying and selling for others or managing and appraising real estate for others are in this division as well.

Business Service Industries

This division includes establishments primarily engaged in providing services more to the business community than to the general public. Included in this division are: employment agencies and personnel suppliers; computer services; accounting and bookkeeping services; advertising services; architectural, engineering and other scientific services; lawyer and notary services; management consulting services; and other business services.

Government Service Industries

Government establishments which engage in activities also carried out by non-government establishments are classified in the same industrial category as their non-government counterparts. There are three types of government establishments which are not found in the non-government universe and are identified as Government Services. These are:

i) establishments engaged in activities of a purely governmental nature - national defence, public order and safety, immigration services, foreign affairs and international assistance, and general services which involve government activities (i.e. taxation, legislatures, etc.);

ii) establishments which direct, support, control and otherwise administer activities carried on largely, but by no means exclusively, by non-government establishments. These activities can be grouped into those which relate to the maintenance and development of human resources and those whose primary concern is with economic development; and,

iii) establishments such as small municipalities which may engage in a wide range of government and non-government activities but whose size precludes specific classification for each of these activities.

Educational Service Industries

This division consists of establishments primarily engaged in providing formal academic or technical training to students through classroom or correspondence instruction. Libraries, museums and other repositories are included in this division.

Health and Social Service Industries

This division consists of establishments primarily engaged in operating institutional and non-institution-

al health and social service facilities, including offices of health and social service practitioners, medical and other health laboratories; health and social services associations and agencies.

Accommodation, Food and Beverage Service Industries

This division consists of establishments primarily engaged in (1) operating hotels, motor hotels, motels, tourist courts, cabins, guest houses and tourist homes; (2) operating restaurants, take-out food and catering services; and (3) selling alcoholic beverages for consumption on the premises.

Other Service Industries

Establishments primarily engaged in operating amusement, entertainment or recreational facilities are classified in this division. Examples in this division include movie theatres, theatrical entertainment, sports clubs, race tracks, bowling alleys and video game arcades.

APPENDIX C

SURVEY QUESTIONNAIRE

Nova Scotia Community College Graduate Follow-up Survey

Final

General Instructions:
o Interviewer must read each set of instructions for each part of this questionnaire.
o Interviewer must record all responses clearly and verbatim where required.
o Interviewer must avoid paraphrasing or rewording responses.

RECORD FOLLOWING INFORMATION:

Respondent's Name: _____
Telephone #: _____
Community: _____
Postal Code: _____
Sample ID: _____

Hello, would **[READ GRADUATE'S NAME]** be available? **[CONTINUE, IF GRADUATE IS AVAILABLE. OTHERWISE, ARRANGE CALLBACK]** Hello, my name is _____ and I work with Corporate Research Associates, a public opinion research company. On behalf of the Nova Scotia Department of Education and Culture, today we are conducting a survey of 1998 graduates of the Nova Scotia Community College. Do you have a few minutes to complete a short questionnaire? **[IF GRADUATE ASKS, SAY THE QUESTIONNAIRE TAKES ABOUT 6 TO 8 MINUTES TO COMPLETE.]**

1. Gender: (By observation): 1 Male 2 Female

2. To begin, what was the highest level of education you successfully completed before attending **[NAME OF CAMPUS]**, from which you graduated from in 1998?
DO NOT READ - CODE ONE ONLY

01 Grade 11 or below
02 Grade 12 (or General Equivalency Diploma 12/GED 12)
03 Some community college
04 Completed community college
05 Some private training/career school
06 Completed private training/career school
07 Some university
08 Undergraduate university degree or certificate
09 Graduate university degree
98 Don't know/No opinion
99 Other (Please specify: _____)

3. During the week of June 20 to 26, 1999, were you attending an educational institution on a **full-time basis**?
CODE ONE ONLY

1	Yes	**SKIP TO Q.6**
2	No	**CONTINUE**
8	Don't know/No answer	**CONTINUE**

4. During the week of June 20 to 26, 1999, were you attending an educational institution on a **part-time basis**? **CODE ONE ONLY**

1	Yes	**SKIP TO Q.6**
2	No	**CONTINUE**
8	Don't know/No answer	**CONTINUE**

5. Since graduating from the community college in 1998, have you taken any further studies? **CODE ONE ONLY**

1	Yes	**CONTINUE**
2	No	**SKIP TO Q.10**
8	Don't know/No answer	**SKIP TO Q.10**

6. Was the educational institution you attended a university, a community college, a private career college, or some other type of educational institution? **CODE MORE THAN ONE IF VOLUNTEERED**

01	University	**CONTINUE**
02	Community college	**CONTINUE**
03	Private career college	**CONTINUE**
99	Another type of educational institution (SPECIFY: ____)	**CONTINUE**
98	Don't know/No answer	**SKIP TO Q.8**

7. What educational institution[s] [are/were] you attending? **PROBE:** Anywhere else? **CODE MORE THAN ONE ONLY IF VOLUNTEERED – PROBE FOR CAMPUS IF GRADUATE SAYS NSCC**

01 Acadia University
02 Annapolis Campus
03 Burridge Campus
04 College of Geographic Sciences/COGS
05 Cumberland Campus
06 Dalhousie University/DalTech
07 Halifax Campus
08 Institute of Technology
09 I.W. Akerley
10 Kingstec
11 Lunenburg Campus
12 Marconi Campus
13 Pictou Campus
14 Saint Francis Xavier University/St. FX
15 Saint Mary's University
16 Shelburne Campus
17 Strait Area Campus
18 Truro Campus
19 University College of Cape Breton
98 Don't Know/No answer
99 Other (SPECIFY: _____)

8. What [is/was] your main field of study?
RECORD VERBATIM

RECORD FIELD OF STUDY:_____
98 Don't Know/No answer

9. After you graduated from the Community College in 1998, why did you decide to further your education? **PROBE:** Anything else? **DO NOT READ - CODE ALL THAT APPLY**

01 Couldn't find any job
02 Couldn't find a job related to my training
03 Interested in another program
04 To keep my job
05 To get a better job/Promotion
06 To make more money
98 Don't know/No answer
99 Other (SPECIFY:_____)

10. Were you employed during the week of June 20 to 26, 1999?
CODE ONE ONLY
